

# PARDON OUR MESS!

Over the next several months the second phase of the renovation project at Sheepscot Valley Health Center will unfold. The first phase—tightening up the basement to keep it dry—was completed in December. Soon work will begin upstairs to improve patient areas and to create better office space for staff. We also plan to make investments to bring the facility into better compliance with ADA accessibility. When the project is completed patients will enjoy a more confidential registration experience and a dedicated, private area in the lab for blood drawing. Medical Records will be moved upstairs to make room for more efficient and professional office space for providers and nurses.

While it will be a challenge to undergo these much needed renovations while continuing to serve patients every day, the results will be worth the disruption. Many thanks to the Sheepscot staff for supporting this project. We also would like to thank all our visitors for their patience during this project, as well as The American Recovery and Reinvestment Act for providing funding.
